

Ann Mathew

ann.e.mathew154@gmail.com | [built-by-ann.github.io](https://github.com/built-by-ann) | (216) 926 0479 | Cleveland (Open to Relocation)

OVERVIEW

Software engineer with experience building full-stack AI applications, working with production software platforms, and teaching applied AI development. Skilled in Python, TypeScript, React, FastAPI, SQL, cloud infrastructure, and LLM-integrated systems, with experience across healthcare, AI, and data-driven products.

EDUCATION

Vanderbilt University | School of Engineering

Nashville, TN

Bachelor of Science; Majors in Computer Science, Climate & Environmental Studies

August 2022 – June 2026

- **Portfolio Site:** built-by-ann.github.io | **GitHub:** github.com/built-by-ann
- **Relevant Coursework:** Data Structures, Algorithms, Intermediate Software Design, AI, Deep Learning, Probability & Statistics for Engineers, Database Management Systems, Senior Projects in Web Systems, Network Analysis in Healthcare, Projects in UX/UI
- **Study Abroad:** Siena, Italy (Spring 2025)

SKILLS

- **Languages:** Python, JavaScript/TypeScript, SQL, Java, C/C++, HTML/CSS
- **Frameworks & Technologies:** OOP, React Native, Node.js, REST APIs, API Design, LLM Integration, Tailwind CSS
- **Developer Tools:** Git/GitHub, Docker, Agile, AI-Assisted Dev (Claude Code/Copilot), Unit Testing, End-to-End Testing
- **Data & ML Tools:** Pandas, NumPy, scikit-learn, TensorFlow, PyTorch, GeoPandas, Tableau, Power BI, QGIS

PROJECTS

MedLens (medlenshealth.com) | AI-Powered Medication Reconciliation Platform

Nashville, TN

Independent Software Engineer [React, TypeScript, FastAPI, PostgreSQL, Docker, LLM Integration, AWS]

June 2026 – Present

- Engineered a full-stack clinical documentation reconciliation platform that ingests clinical notes, extracts structured medication information using AI, and automatically detects discrepancies between documentation and medication records for providers to efficiently review and reconcile.
- Designed and implemented a hybrid reconciliation engine that combines LLM-based extraction with deterministic validation, producing evidence-backed results while remaining explainable, testable, and provider-agnostic.

MorningCall | AI-Powered Full-Stack Mobile Application

Nashville, TN

Full-Stack Developer for Projects in Web Systems [Full-Stack Development, React Native, REST-APIs]

January 2026 – May 2026

- Developed end-to-end features for an AI-powered mobile productivity assistant, implementing personalized morning routines, habit tracking, task management, and conversational AI within a cohesive user experience.
- Engineered scalable frontend and backend functionality that connected mobile interfaces, secure APIs, authentication, and persistent user data to deliver personalized productivity workflows.

PROFESSIONAL EXPERIENCE

NCompas | AI-Powered Enterprise Software Platform

Cleveland, OH

Forward Deployed Engineer Intern [Full-Stack Development, AI Platforms, Client Solutions]

September 2026 – Present

- Building and shipping production-ready changes to a full-stack AI platform, working across application services, APIs, integrations, and supporting infrastructure to deliver customer-facing functionality.
- Participating directly in client meetings to gather requirements and understanding operational workflows, then translating customer needs into technical solutions, troubleshooting issues, and supporting testing and deployment into production.

MentisPrep | AI & Computer Science Capstone Education Program

Nashville, TN

AI Champions Instructor [Python, AI/LLM Integration, Technical Communication]

May 2024 – August 2024

- Serving as the sole instructor for a 34-week project-based AI and software development program for students in grades 9-12, teaching Python, AI model integration, web applications, data-driven AI systems, and responsible AI.
- Leading weekly hands-on programming sessions in which students progress from Python applications and chatbots to document-based AI tools and full AI applications, culminating in a team capstone and public Demo Day.

Vanderbilt University Medical Center | Department of Biomedical Informatics

Nashville, TN

Research Intern [SQL, Data Analysis, Clinical Informatics]

May 2024 – August 2024

- Collaborated with Dr. Allison McCoy (PhD) to assess gaps in EHR medication records, contributing to recommendations for improving the accuracy of medication documentation in electronic health records, specifically when medications are no longer being taken.
- Conducted a comprehensive analysis of medication discontinuation practices through evaluation of 37,000+ patient encounters and interviewing physicians across various specialties, uncovering key inconsistencies and inaccuracies in medication documentation in the EHR.
